INTRODUCTION

Oakland raised. Highly interested in Software Engineering and creating a space for women of color to prosper in STEM. A first-gen engineering student at UC Berkeley studying Electrical Engineering and Computer Science. I have enjoyed my course that has been specialized towards product design and UI.

MAJOR ACHIEVEMENTS

Lawrence Berkeley National Laboratory

| April 2023 - Present

Student Assistant | Berkeley, CA

My position entails working with K-12 students, where I facilitate and lead engineering projects involving Arduino and CAD. I also spent time teaching students coding skills in Python and C++.

I created a curriculum for students where they were taught the basics of Arduino and used these skills to make an autonomous robot using an ultrasonic sensor. This consisted of designing the curriculum, and the robot, and programming it for the students.

RoboBears

| August 2021 - Present

President | Berkeley, CA

A highly selective club at the University of California, Berkeley. Design and build combat robots and compete nationwide. As a club member, I have developed skills: in metal shop, CAD, and Fusion. We design competitive 3-lb robots on CAD software (such as Fusion and SolidWorks), manufacture parts in a machine shop, and use skills in circuitry to control the robot with a remote controller.

My position as President consists of interacting with and creating a curriculum for students to gain hands-on experience in robotics by walking them through the design process and manufacturing their robots. I am the head instructor for this class which is sponsored by Professor Mark Mueller at UC Berkeley. I have been responsible for instructing 30 students during the Fall Semester for the past 4 years.

IMentor Bay Area

| August 2019 - Present

Mentee | Oakland, CA

Partnered with a mentor to build a successful post-secondary plan in alignment with my career and professional development.

Google's Computer Science Summer Institute

| 2021

Student | Virtual

A highly competitive program consists of a four-week course designed to help transition students into the first year of college in pathways toward technology careers. Learned Java and web development, which prepared me for college-level courses. Worked on creating websites using Google Firebase to collect user data.

Code Next Oakland by Google

| 2017 - 2021

Member | Oakland, CA

A highly selective program that works with Black and Latinx high schoolers to educate them on careers in STEM. Learned various programming languages, App/Web development, Circuit design, UX Design, and Robotics.

Key Accomplishments: Robotics Competition Finalist as a 3lb self-driven car that navigated an obstacle course.

Google Code Next Hackathon, 2nd Place Winner, Save H2O

| 2019

Topic: Environmental Sustainability. Created a website that connected users to local beach clean-up sites..

EDUCATION

The University of California, Berkeley | Expected Graduation: June 2025

Major: Electrical Engineering and Computer Science

Classes taken: *CS61a*-Structure and Interpretation of Computer Programs, *CS61b*-Data Structures, *EECS 16a*-Designing Information Devices and Systems I, *CS 61C*- Computer Architecture (Machine Structures), *EECS 16b*-Designing Information Devices and Systems II, *Math 53*-MultiVariable Calculus, *Math 1a/b*-Calculus, Physics 7a/7b, Data Science 8, CS161- *Computer Security*

Aspire Lionel Wilson College Preparatory Academy Class of 2021

Student Government | 2020- 2021

BUILD | 2017- 2021

Vice President | Oakland, CA

Design Challenge Participant | Oakland, CA

Peralta Community College District | Student 2018- 2021

I took the initiative to enroll in dual enrollment at a community college as a high school student.

Academic Talent Development Program at UC Berkeley | Student 2018

Four-week course program in Advanced Biotechnology encouraging youth to explore potential careers. Learned molecular biology laboratory techniques, including DNA extractions, gel electrophoresis, and more.

SKILLS

Java, Javascript, HTML, CSS, SQL, XML, Python, and C++ | iOS | Android | Bilingual English/Spanish | CAD | Education
